\$3.00 FOR GRAIN has been paid by persons wanting a few bushels of a choice article to Sow.

Now this is shewn on their part, and no one seems to be surprised at such a result.

It would be wise to be wary of such a result.

The farmer should be governed by the rule in getting a SOW of the right GRAIN, with even and small NAP that some master workmen are able to Sow, and has left upon it an even, clean, and firm SEED.

ILY SEWING MACHINES.—The particular attention of ladies is called to the above machine, which possesses the following decided and unmistakable advantages:

1st. Cotton is used as it is purchased—on spools without re-winding; saving time, trouble and waste.

2d. The trouble and perplexity of fitting a shuttles, (as in other machines,) is in this avoided; no shuttle is employed, the under thread being used from a large spool.

3d. It is very simple yet strong in construction, easily learned and kept in order, and does not require to be taken apart to be oiled.

4th. The shuttle is always distinct, even and regular, and will not rip though every fourth stitch be cut.

5th. The shuttle is as elastic as the most elastic fabric.

This Machine embroiders beautifully.

Ladies and others interested in the saving of labor are invited to call at the sales-room of the subscriber and examine for themselves. The above machines are freely shown and samples of work given at all times.

The services of a lady and the use of a machine can be obtained by the day in families, by calling at the room of Mr. Hopkins. Terms \$1.50 per day.
